PROFESSIONAL SUMMARY

Detail-oriented Civil Engineering graduate with hands-on experience in software development, game programming, and custom electronic hardware prototyping for academic projects. Possesses strong foundational technical skills across programming, 3D modeling, and hardware assembly, alongside a proactive, fast-learning mindset. Open to opportunities across technical and non-technical roles.

WORK EXPERIENCE

Freelance **2024 - Current**

Freelancer *Alangilan, Batangas City, Batangas*

- Designed detailed 3d models and architectural renders using SketchUp, enabling clients to effectively visualize project concepts.
- Developed precise 2d floor plans and technical drawings tailored to client specifications, enhancing project accuracy and satisfaction.
- Engineered and assembled custom electronic hardware projects, delivering functional prototypes and innovative solutions for academic theses.
- Managed all aspects of freelance operations, including client consultations and project delivery, ensuring timely completion and client satisfaction.

PROJECTS

Portfolio Website

Web Developer | Next.js, React, TypeScript, Tailwind CS https://santoshans-portfolio.vercel.app/

- Built a responsive services portfolio with project showcases, direct contact links, keyboard navigation, and image fallbacks; verified desktop and mobile behavior with Playwright.

Smart Fingerprint Unlock Drawer

Embedded Systems Developer | ESP32, C++, UART, Wi-Fi

https://github.com/hanssantos02/Smart-Fingerprint-Unlock-Drawer

Developed ESP32 firmware for fingerprint enrollment, UART sensor integration, lock control, and automatic relocking, with a local Wi-Fi dashboard for user management and recent activity.

Cloak

Hackathon Team Project | Next.js, React, TypeScript, OCR, Local AI https://github.com/hanssantos02/cloak

- Contributed to a file-review application with sensitive-information detection, keep/redact decisions, previews, and exports that preserve originals; supports local-model analysis and a rules-only fallback.

Heirloom **2026**

Indie Game Developer https://nexussky.itch.io/heirloom

- Created a 2D Pixel Roguelite Game using innovative design techniques, contributing to the indie gaming community.

EDUCATION

Batangas State University **2021 - 2026**

BS Civil Engineering *Alangilan, Batangas City, Batangas*

SKILLS

- **Skills:** Customer Service; Attention to Detail; Proficiency in Programming Languages (C++, Python, GDScript, HTML, CSS, Javascript); 3D Rendering in SketchUp; Knowledge in Electronics & Embedded Systems; Friendly and approachable demeanor
